Jollof Fest Canada 2026 is organized by PAACATI (Pan-African Arts, Culture and Trade Institute), a registered non-profit Canada-based organization committed to promoting African culture, entrepreneurship, trade, investment, and diaspora engagement between Canada and Africa.

Jollof Fest is an annual multicultural event featuring food exhibitions, cultural showcases, live entertainment, business networking sessions, educational forums, and community engagement activities designed to strengthen economic and cultural ties between Canada, West African and Caribbean communities.

Davidorlah Nigeria Limited has been officially invited as a participating organization in recognition of its contributions to agriculture, agro-processing, and food value-chain development. During the event, Davidorlah will participate in panel discussions, networking sessions, investor engagements, and educational presentations focused on:

- Promoting sustainable economic opportunities within Africa, especially in agriculture and agro-processing.
- Encouraging productive diaspora participation in African economic development.
- Creating awareness about the vast agricultural investment opportunities available in Nigeria and across Africa.
- Presenting Davidorlah's agro-industrial initiatives and pineapple value-chain projects to the diaspora community and potential international partners.
- Supporting conversations around reducing excessive migration pressures by creating economic opportunities within Africa.

We believe Davidorlah's participation will contribute positively to the objectives of the event and also provide broader benefits to Canada through:

- Strengthening Canada–Africa cultural and economic relationships.
- Promoting lawful international business and investment partnerships.
- Encouraging entrepreneurship, food security, and sustainable development initiatives.
- Supporting constructive diaspora engagement and international cooperation.
- Building future trade and investment relationships between Canadian stakeholders and African agribusiness sectors, and agribusiness innovation in Nigeria.
